

M. P. I.

M P I:

Many professors inside
must prove identities,
motivate peculiar ideas,
match powerful images,
manufacture pretty insights;
maybe publish Inventions?

More postdocs involved
mailing party invitations,
making progress impossible;
main problem is
my private investigation.

Most pleasant income,
multiplying positive integers,
maximizing prime ideals,
manipulating physical intuition;
modular period integrals
making people insane.

Math Problems Incorporated.
M P I.
